

OPEN DATA FACT SHEET

EUROPE & CENTRAL ASIA

This fact sheet is based on data from the Open Data Impact Map, a public database of organizations that use open data from around the world. 422 organizations from the region were assessed to develop these findings. To learn more, visit: <http://OpenDataImpactMap.org/eca>

Europe and Central Asia comprises the second largest number of organizations using open data, after North America. It includes many commercial enterprises, a large number of which are SMEs, and an active developer community.

* The regions and country income levels reflect the World Bank geographic regions and income-level classifications.

SUMMARY

Organizations in [Europe and Central Asia](#) use open data across all sectors, with the most in the IT and geospatial, governance, business research and consulting sectors. The information most used in the region includes geospatial, government operations, transportation, demographic and social data and statistics.

Overall, both established and new organizations are using open data in the region. Over two thirds are for-profit, and almost half of the organizations are small organizations with ten or fewer employees. The majority of commercial enterprises are located in higher income countries. In low and middle income countries (Moldova, Georgia, Ukraine, Kosovo), the organizations that use open data tend to be nonprofits using the resource to promote economic and social development.
